

On the diagram, label the following features:

**estuary   gorge   meander   source   tributary   waterfall**

- 1) What is another name for the start of a river?
- 2) Why is the river valley made deeper?
- 3) How is a gorge formed?
- 4) When may a river flood? Why?
- 5) Color the picture in.

Name \_\_\_\_\_

Date \_\_\_\_\_

There are bodies of water all over our planet. Describe the different bodies of water **using the words** *small, large, fresh, salt, deep, shallow, protected, still,* and *flowing*. Try to use at least two adjectives per description. (Note: fresh, salt get combined with water as freshwater, saltwater).

A lake is a large body of freshwater.

A sea \_\_\_\_\_

A river \_\_\_\_\_

A pond \_\_\_\_\_

A stream \_\_\_\_\_

An ocean \_\_\_\_\_

A puddle \_\_\_\_\_

A bay \_\_\_\_\_

A creek \_\_\_\_\_

A cove \_\_\_\_\_

An inlet \_\_\_\_\_

A lagoon \_\_\_\_\_

An oasis \_\_\_\_\_

A tide pool \_\_\_\_\_
