Position and Z-index

For this assignment, please style everything in the head.

1. Create a web page with a black background.

2. Create a large, main div that is 900 by 600 pixels. Center it using margins. Color it red. It should be relatively positioned.

3. Position a div 200 by 200 px OUTSIDE of the red div. Position it 100 pixels from the top and 100 pixels from the left of the page. Color it green. It should be absolutely positioned. (Remember that for most divs, if nothing is inside, put a   inside as a place holder.)

4. Position a div 200 by 200 px INSIDE of the red div. Color it blue. Make it absolutely positioned. Make it 20 pixels from the top and 150 pixels from the left.

5. Position a div 600 by 200 px OUTSIDE of the red div. Color it yellow. Position it 150 px from the top make it all the way to the left, and give it a z-index of 4. It should be absolute.

Practice resizing the page to notice the behavior of the divs.
