

Assignment 5: Links and Photos

Requirements

- Create a second page.
- Create a link from your first page to your second using a relative link.
- Add at least two pictures to your pages.
- Make sure the pictures have an appropriate "alt" tag.
- Put the correct width and height codes for the pictures.
- Turn one picture into a link to a site on the web using an absolute link.
- Make the background of one page a tiling background image.
- Put all of your files (pictures, html files) in one folder.
- Zip your folder and email it to Ms. Lowe.

Basic tags used

```
<a href="">LINK WORDS</a>  
    Relative link only has <a href="file.html">  
    Absolute link has <a href="http://www.sitename.com/">  
  
    gif, jpg, and png pictures will work on the web. Files with bmp won't  
  

```

CSS

```
<body style="background-image: url('filename.gif');">  
May work as: <body style="background-image: url(filename.gif);">
```

Extra awesome background-repeat:repeat-x; background-repeat:repeat-y;
 background-repeat:no-repeat;
 background-position:right top; background-attachment:fixed;
