

## Precision Web Design

Here is the website you are going to build:

You will use your name instead of “Lowe”, and you will be provided with all of the pictures.

All addresses and phone numbers on the page should be fake.

Make sure you download the detailed instructions. They can be found at: <http://science.pageofmystery.com/html/precise.pdf>

You will also need to download the five necessary pictures and samples needed for this page. They are at: <http://science.pageofmystery.com/html/precise.zip>

You will be graded based on how exactly your final matches the client's request. I am your client, and I want your page built as the instructions dictate.

Good luck!
