Create Basic Pictures: Car Still (15 points)

The details of this assignment are in the tutorial. It can be found at
    http://pageofmystery.com/flash/FLASH/1CAR/carDrawing.html

Your requirements are to create a car in Flash. You will NOT be graded on how it looks, but you can earn some bonus for style. It MUST have wheels that are somewhat separate from the car.

Basics:
1. Create a car using basic shapes, and then modify the shapes to smooth the car.
2. Create wheel wells by using a circle to "cut out" spaces from the car.
3. Make a wheel slightly smaller than the wells.
4. Make a hubcap for the wheel.
5. Duplicate the wheel and place the second wheel in the correct location.
6. Safe the .fla file, but export the image as a .png, specifically carStillFirstLast.png
        Sally Smith would save it as carStillSallySmith.png
7. Zip the .png and the .fla files together.
8. Mail the zipped files to me.

Grading:

Points	Requirements
1	Car looks like a car
2	Car has no stroke (outline)
2	Car shows smoothing and shape changing
2	Wheel wells are larger than tires
2	Wheels are identical
2	Wheels have hubcaps
2	Still image sent as .png
2	The .fla file is present

Total   15

BONUS!!!!!   Add coolness to your car by adding details, windows, style, or other awesomeness.
