

Shape Tweens: Square and Circle (10 points)

The details of this assignment are in the tutorial. It can be found at

<http://pageofmystery.com/flash/FLASH/2SHAPETWEEN/shapeTween.html>

Using a “shape tween” you need to turn a blue square into a red figure-eight shape (colors negotiable).

Basics:

1. Create a blue square with a stroke (line) on the outside of it.
2. Create a keyframe further down the timeline (about 35 frames or so).
3. Add a red circle with a stroke on the second keyframe.
4. Right-click on the timeline and add a shape tween.
5. Delete the blue square from the second keyframe.
6. Copy the circle and overlap it with the first.
7. Delete the overlapping stroke.
8. On a separate layer, add your name.
9. Save the .fla file, but export the MOVIE as a .swf, specifically shapeTweenFirstLast.png
Sally Smith would save it as shapeTweenSallySmith.png
10. Mail the .swf to me.

Grading:

<u>Points</u>	<u>Requirements</u>
2	Starts as a square (blue, with stroke)
6	Ends as red circles (with stroke) Red (1) Circles Overlap (1) Still has stroke (2) Shape-tween works (2)
<u>2</u>	<u>The .swf file was correctly sent, with name</u>
Total	10

Feel free to send other shape-tween experiments too!
