

Request form – Debra Lowe (version 2.0)

I understand that there has been a move away from some types of labs, and have changed my requests accordingly. I have shaved off all student supplies, except for microscopes. I have cut down on other supplies as well. I would still like to demonstrate some principles of science in front of the students. Also, the State Core requires things such as measuring (scales and cylinders) and viewing nature (microscope slides), so I do consider these items crucial. Please reconsider this portion of the list. I have shaved the cost from just under \$560.00 to about \$300.00.

Feel free to leave anything off the list. I would be grateful for anything I can get.
